Keyword: Keywords that are currently being bid on in your PPC campaign.

Viewed: This is the number of times your paid ad has been displayed on Google when someone has typed the corresponding keyword in their search

CTR (Click-Through-Rate): This is the number of the times your ad has been viewed divided by the number of times someone has clicked on your paid ad. This is used to show the effectiveness of your paid ad. Ads that have a higher CTR are shown to more people and in more prominent positions, as Google feels they are more relevant to what their users are searching for.

Avg CPC (Average Cost-per-Click): The average cost for each click your paid ad received.

Cost: The total cost of your paid ad.

Avg Position: The average position your ad is placed. There are 8 ads per page and the top spots are positions 1-3, as research has shown that these are looked at by most Google users.

Content Targeting Total: Google AdWords displays your paid ad not only on Google.com but also on its partnering websites known as the Google Network. If a partnering website has content that Google deems related to your website, it will display your paid ad on that site. Content targeting is optional. You can also choose to do site-targeting PPC campaign in the Gold and Platinum SEO Packages (ask your business manager for more details)
